The figure consists of two polar plots, one for the left side (Gauche) and one for the right side (Droite). Both plots share the same axes: concentric circles representing effort levels from 0 to 40 in increments of 10, and radial lines representing angles from 0 to 90 degrees in increments of 10. The legend indicates three types of data points: green circles for 'Perçus' (perceived), red triangles for 'Non perçus' (not perceived), and open circles for 'Non testés' (not tested).

Gauche (Left Side):

- Perçus (Green Circles):** One point at approximately 30 effort and 0 degrees, and another at approximately 30 effort and 30 degrees.
- Non perçus (Red Triangles):** None visible.
- Non testés (Open Circles):** Numerous points scattered across the plot, mostly between 10 and 20 effort levels.

Droite (Right Side):

- Perçus (Green Circles):** One point at approximately 30 effort and 0 degrees, and another at approximately 30 effort and 30 degrees.
- Non perçus (Red Triangles):** Two points at approximately 10 effort and 0 degrees, and another at approximately 10 effort and 30 degrees.
- Non testés (Open Circles):** Numerous points scattered across the plot, mostly between 10 and 20 effort levels.
