The figure consists of two polar plots, one for the left side (Gauche) and one for the right side (Droite). Each plot has concentric circles representing effort levels at 10, 20, 30, and 40, and radial lines representing angles from 0 to 90 degrees. Data points are categorized as 'Perçus' (green circles), 'Non perçus' (red triangles), and 'Non testés' (grey circles). In the 'Gauche' plot, 'Perçus' points are at 90° (level 10) and 0° (level 30), while 'Non perçus' points are at 90° (level 10) and 0° (level 30). In the 'Droite' plot, 'Perçus' points are at 90° (level 10) and 0° (level 30), while 'Non perçus' points are at 90° (level 10) and 0° (level 30). 'Non testés' points are distributed across various angles and effort levels in both plots.
