Figure 1 consists of two polar plots, one for 'Gauche' (left) and one for 'Droite' (right). Both plots use a polar coordinate system where the angle represents the direction (0 to 90 degrees) and the radial distance represents the magnitude (0 to 40). The plots show the distribution of points categorized as 'Perçus' (green circles), 'Non perçus' (red triangles), and 'Non testés' (open circles). In the 'Gauche' plot, 'Perçus' points are located at approximately (0, 30) and (30, 30), while 'Non perçus' points are at approximately (0, 0) and (30, 0). In the 'Droite' plot, 'Perçus' points are located at approximately (0, 30) and (30, 30), while 'Non perçus' points are at approximately (0, 0) and (30, 0). The 'Non testés' points are distributed across the entire range of angles and radial distances.
