Figure 1 consists of two circular diagrams, one for 'Gauche' (left) and one for 'Droite' (right). Each diagram is a polar plot with concentric circles representing values from 0 to 40 in increments of 10, and radial lines representing angles from 0 to 90 degrees in increments of 10. The legend indicates three types of data points: green circles for 'Perçus' (perceived), red triangles for 'Non perçus' (not perceived), and open circles for 'Non testés' (not tested). In the 'Gauche' diagram, 'Perçus' points are located at approximately (0, 30) and (90, 10). 'Non perçus' points are at approximately (0, 10) and (90, 10). 'Non testés' points are scattered throughout the plot. In the 'Droite' diagram, 'Perçus' points are at approximately (0, 30) and (90, 10). 'Non perçus' points are at approximately (0, 10) and (90, 10). 'Non testés' points are scattered throughout the plot.
