The figure consists of two polar plots, one for 'Gauche' (left) and one for 'Droite' (right). Both plots share a common radial scale from 0 to 40 and a common angular scale from 0 to 90 degrees. The legend indicates three types of data points: green circles for 'Perçus' (perceived), red triangles for 'Non perçus' (not perceived), and open circles for 'Non testés' (not tested). In the 'Gauche' plot, 'Perçus' points are located at approximately 0, 30, and 90 degrees. In the 'Droite' plot, 'Perçus' points are located at approximately 0, 30, and 90 degrees. 'Non perçus' points are not visible in either plot. 'Non testés' points are distributed across the angular range from 0 to 90 degrees in both plots.
